DETAILED ACTION

The indicated allowability of claim 9 is withdrawn.

Claim Objections

Claims 4-9 are objected to because of the following informalities:

The components of the second yoke required for the connection to the first yoke are essential to the practice of the invention, but not included in the claims. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 23 is rejected under 35 U.S.C. 102(b) as being anticipated by JP 2002181070A.

Regarding claim 23, JP 2002181070A discloses a trunnion (30), bearings (33) and an overmold means (21) on the body portions (14).

Allowable Subject Matter

Claims 19 and 20 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record does not disclose or suggest all the claimed subject matter

including the overmold portion fills a groove formed in the trunnion assembly.

The prior art of record does not disclose or suggest all the claimed subject matter including a plurality of tabs formed from the first overmold portion.
